### FARO® Introduces PointSense 18.0 Suite for Construction and Architecture

April 24, 2017

#### Seamless Integration of 3D Scanner Data with Autodesk 2018 Design Tools

LAKE MARY, Fla., April 24, 2017 /PRNewswire/ -- FARO® (NASDAQ:FARO), the world's most trusted source for 3D measurement and imaging solutions for factory metrology, construction BIM/CIM, product design, public safety forensics, and 3D solutions, announces the availability of the FARO PointSense 18.0 software suite (http://us.faro3dsoftware.com). This robust software platform evolution delivers seamless integration into the latest 2018 AutoCAD® and Revit® design tools, a better user experience, improved software handling and enhanced efficiency in processing software data

The suite includes:

- PointSense basic/Pro for AutoCAD®
- PointSense Building for AutoCAD®
- PointSense Heritage for AutoCAD<sup>®</sup>
- PointSense Plant for AutoCAD<sup>®</sup>
- PointSense for Revit®

The one stop bundle and compatibility across the broad range of Autodesk architecture, engineering, construction and surveying products makes this the most cost effective solution of its kind currently available.

## Seamless Integration and Enhanced User Experience

PointSense 18.0 resets the bar for "ready to go". It includes the same high value, beneficial use features and functionality with which savvy AutoCAD<sup>®</sup> and Revit<sup>®</sup> users are already familiar. The addition of a new, step by step guidance screen assures that even less familiar users can get up to speed quickly and optimize their workflow.

#### Improved Confidence in Accuracy

PointSense 18.0 for Revit<sup>®</sup> is the first software platform to incorporate *Levels of Accuracy* as defined USBID (U.S. Institute of Building Documentation) standards. This enhanced analysis tool enables users to more confidently validate the accuracy of the as-built model compared to the relevant point cloud, i.e. the set of data points acquired by a 3D laser scanner.

### **Workflow Enhancement**

The improvement in scan navigation functionality was driven by direct user feedback, supports greater efficiency and assures that the user is able to get to a result faster than ever before. With just a double click, users can move from one scan perspective to another inside a given point cloud.

"We continue to push forward in our commitment to creating even more value for the Architecture, Engineering and Construction market segments," states Andreas Gerster, Vice President Global Construction BIM-CIM business unit. "PointSense 18.0, used in combination with 3D laser scanners such as the industry leading FARO Focus<sup>3D</sup> is a direct reflection of this commitment, as it delivers a powerful new set of easy to use software solutions in a single package. We are both excited and validated about the unique value that PointSense 18.0 delivers not only to AutoCAD<sup>®</sup> and Revit<sup>®</sup> users in general, but also as a tightly integrated, high performance bundle for FARO Focus<sup>3D</sup> Scanner users."

PointSense 18.0 is available for ordering today.

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that are subject to risks and uncertainties, such as statements about demand for and customer acceptance of FARO's products, and FARO's product development and product launches. Statements that are not historical facts or that describe the Company's plans, objectives, projections, expectations, assumptions, strategies, or goals are forward-looking statements. In addition, words such as "is," "will" and similar expressions or discussions of FARO's plans or other intentions identify forward-looking statements. Forward-looking statements are not guarantees of future performance and are subject to various known and unknown risks, uncertainties, and other factors that may cause actual results, performances, or achievements to differ materially from future results, performances, or achievements expressed or implied by such forward-looking statements. Consequently, undue reliance should not be placed on these forward-looking statements.

Factors that could cause actual results to differ materially from what is expressed or forecasted in such forward-looking statements include, but are not limited to:

- development by others of new or improved products, processes or technologies that make the Company's products less competitive or obsolete;
- the Company's inability to maintain its technological advantage by developing new products and enhancing its existing products;
- declines or other adverse changes, or lack of improvement, in industries that the Company serves or the domestic and
  international economies in the regions of the world where the Company operates and other general economic, business,
  and financial conditions; and
- other risks detailed in Part I, Item 1A. Risk Factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

Forward-looking statements in this release represent the Company's judgment as of the date of this release. The Company undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events, or otherwise, unless otherwise required by law.

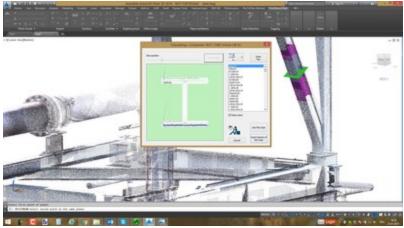

# **About FARO**

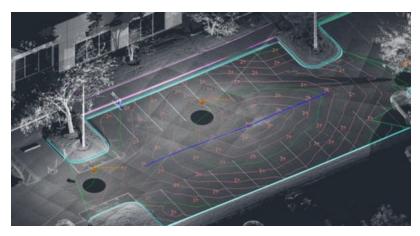

FARO is the world's most trusted source for 3D measurement, imaging and realization technology. The Company develops and markets computer-aided measurement and imaging devices and software. Technology from FARO permits high-precision 3D measurement, imaging and comparison of parts and complex structures within production and quality assurance processes. The devices are used for inspecting components and assemblies, rapid prototyping, documenting large volume spaces or structures in 3D, surveying and construction, as well as for investigation and reconstruction of accident sites or crime scenes.

FARO's global headquarters are located in Lake Mary, Florida. The Company also has a technology center and manufacturing facility consisting of approximately 90,400 square feet located in Exton, Pennsylvania containing research and development, manufacturing and service operations of our FARO Laser Tracker™ and FARO Cobalt Array 3D Imager product lines. The Company's European regional headquarters is located in Stuttgart, Germany and its Asia Pacific regional headquarters is located in Singapore. FARO has other offices in the United States, Canada, Mexico, Brazil, Germany, the United Kingdom, France, Spain, Italy, Poland, Turkey, the Netherlands, Switzerland, India, China, Malaysia, Thailand, South Korea, Australia and Japan.
