FARO Reports Second Quarter 2012 Sales and Net Income Growth of 11.8%

July 31, 2012

LAKE MARY, Fla., July 31, 2012 /PRNewswire/ -- FARO Technologies, Inc. (NASDAQ: FARO) today announced results for the second quarter ended June 30, 2012. Sales in the second quarter of 2012 increased 11.8% to \$66.8 million, from \$59.7 million in the second quarter of 2011. The Company reported net income increased by 11.8% to \$4.7 million, or \$0.28 per share, in the second quarter of 2012, from \$4.2 million, or \$0.25 per share, in the second quarter of 2011.

(Logo: http://photos.prnewswire.com/prnh/20110415/MM84316LOGO)

New order bookings for the second quarter of 2012 were \$71.0 million, an increase of 13.6% from \$62.5 million in the second quarter of 2011.

"We had strong results in Asia and the Americas with sales increasing by 28.8% and 17.4%, respectively, over the second quarter of last year. Despite a sluggish and uncertain European economy, sales in Europe increased 9.4% when measured in Euros. However, due to the strengthening of the US dollar, European sales showed a modest decline of 2.9% when translated to US dollars," stated Jay Freeland, FARO's President and CEO. "Net income grew at the same pace as revenue even after absorbing considerable expenses related to litigation, the completion of FCPA monitoring activities and the unfavorable effect of exchange rates."

Gross margin for the second quarter of 2012 was 55.5%, compared to 56.1% in the second quarter of 2011 and reflects lower average selling prices resulting from promotions to reduce inventory in preparation for new product introductions and an increase in sales of the Laser Scanner products sold through our distributor channel.

The Company's operating margin for the second quarter increased to 10.3%, compared to 9.6% in the second quarter of 2011 and included approximately \$1.2 million of professional fees related to the final review by the FCPA Monitor and an increase in patent litigation expenses of \$0.4 million. The Company does not expect to incur further expenses related to FCPA matter going forward.

"In the second half of the year, we expect continuing economic headwinds in Europe that could spill over to other regions. Accordingly, we will be vigilant in cost containment while continuing to invest in product development and driving aggressive sales and marketing activities," Freeland concluded.

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that are subject to risks and uncertainties, such as statements about demand for its products, and its future operating results and financial condition. Statements that are not historical facts or that describe the Company's plans, objectives, projections, expectations, assumptions, strategies, or goals are forward-looking statements. In addition, words such as "intend," "believe," "will," "expect" and similar expressions or discussions of FARO's plans or other intentions identify forward-looking statements. Forward-looking statements are not guarantees of future performance and are subject to various known and unknown risks, uncertainties, and other factors that may cause actual results, performances, or achievements to differ materially from future results, performances, or achievements expressed or implied by such forward-looking statements. Consequently, undue reliance should not be placed on these forward-looking statements.

Factors that could cause actual results to differ materially from what is expressed or forecasted in such forward-looking statements include, but are not limited to:

- development by others of new or improved products, processes or technologies that make the Company's products obsolete or less competitive;
- production delays caused by shortages of raw materials incorporated in the Company's products;
- the cyclical nature of the industries of the Company's customers and material adverse changes in customers' access to liquidity and capital;
- declines or other adverse changes, or lack of improvement, in industries that the Company serves or the domestic and
 international economies in the regions of the world where the Company operates and other general economic, business,
 and financing conditions;
- risks associated with international operations, such as fluctuations in currency exchange rates, difficulties in staffing and managing foreign operations, political and economic instability, compliance with import and export regulations, and the burdens and potential exposure of complying with a wide variety of U.S. and foreign laws and labor practices;
- other risks detailed in Part I, Item 1A. Risk Factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Forward-looking statements in this release represent the Company's judgment as of the date of this release. The Company undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events, or otherwise.

About FARO

With over 30,000 installations and 15,000 customers globally, FARO Technologies, Inc. designs, develops, and markets portable, computerized measurement and imaging devices and software used to create digital models -- or to perform evaluations against an existing model -- for anything requiring highly detailed 3-D measurements, including part and assembly inspection, factory planning and asset documentation, as well as specialized applications ranging from surveying, recreating accident sites and crime scenes to digitally preserving historical sites.

FARO's technology increases productivity by dramatically reducing the amount of on-site measuring time, and the various industry-specific software packages enable users to process and present their results quickly and more effectively.

Principal products include the world's best-selling portable measurement arm -- the FaroArm; the world's best-selling laser tracker -- the FARO Laser Tracker X and Xi; the FARO Laser ScanArm; FARO Focus 3D Laser Scanner; the FARO Gage, Gage-PLUS and PowerGAGE; and the CAM2 Q family of advanced CAD-based measurement and reporting software. FARO Technologies is ISO-9001 certified and ISO-17025 laboratory registered.
