

## 3D Metrology Software from FARO Delivers a Tailored Solution for Tactile Probing Applications

December 1, 2015

LAKE MARY, Fla., Dec. 1, 2015 /PRNewswire/ -- FARO Technologies, Inc. (NASDAQ: FARO), the world's most trusted source for 3D measurement and realization technology, announces the release of CAM2® Measure 10 – Probing, the latest version in the CAM2 Measure 10 software suite, for the FaroArm® and FARO Laser Tracker product lines.

CAM2 Measure 10 – Probing is engineered for users whose 3D data requirements are focused on tactile measurements, without the need for point cloud data analysis. It is a powerful software package for CAD and non-CAD inspection and Geometric Dimensioning and Tolerancing. This new release advances FARO's commitment to deliver 3D metrology software that allows its customers to measure quickly, efficiently, and with unmatched simplicity.

"CAM2 Measure 10 – Probing is an ideal solution for users who do not need to utilize FARO's powerful point cloud capabilities. It is a tailored solution that gives our customers increased choices when it comes to functionality and cost," stated Kathleen J. Hall, Senior Vice President and Managing Director - Americas.

FARO's comprehensive software version, CAM2® Measure 10 – Full, continues to be the full-range solution for both tactile measurement and non-contact 3D scanning applications and is compatible with all of FARO's major metrology devices including the ScanArm.

*This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that are subject to risks and uncertainties, such as statements about demand for and customer acceptance of FARO's products, and FARO's product development and product launches. Statements that are not historical facts or that describe the Company's plans, objectives, projections, expectations, assumptions, strategies, or goals are forward-looking statements. In addition, words such as "is," "will," "continues" and similar expressions or discussions of FARO's plans or other intentions identify forward-looking statements. Forward-looking statements are not guarantees of future performance and are subject to various known and unknown risks, uncertainties, and other factors that may cause actual results, performances, or achievements to differ materially from future results, performances, or achievements expressed or implied by such forward-looking statements. Consequently, undue reliance should not be placed on these forward-looking statements.*

*Factors that could cause actual results to differ materially from what is expressed or forecasted in such forward-looking statements include, but are not limited to:*

- *development by others of new or improved products, processes or technologies that make the Company's products less competitive or obsolete;*
- *the Company's inability to maintain its technological advantage by developing new products and enhancing its existing products;*
- *declines or other adverse changes, or lack of improvement, in industries that the Company serves or the domestic and international economies in the regions of the world where the Company operates and other general economic, business, and financial conditions; and*
- *other risks detailed in Part I, Item 1A. Risk Factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.*

*Forward-looking statements in this release represent the Company's judgment as of the date of this release. The Company undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events, or otherwise, unless otherwise required by law.*

### **About FARO**

FARO is the world's most trusted source for 3D measurement technology. The Company develops and markets computer-aided measurement and imaging devices and software. Technology from FARO permits high-precision 3D measurement, imaging and comparison of parts and complex structures within production and quality assurance processes. The devices are used for inspecting components and assemblies, rapid prototyping, documenting large volume spaces or structures in 3D, surveying and construction, as well as for investigation and reconstruction of accident sites or crime scenes.

The Company's global headquarters is located in Lake Mary, FL; its European regional headquarters in Stuttgart, Germany; and its Asia Pacific regional headquarters in Singapore. FARO has other offices in the United States, Canada, Mexico, Brazil, Germany, the United Kingdom, France, Spain, Italy, Poland, Turkey, the Netherlands, Switzerland, Portugal, India, China, Malaysia, Vietnam, Thailand, South Korea, and Japan.
